Proposed New Claim

86. (Proposed New Claim) A method of treating a subject having a disorder characterized by unwanted cell proliferation, the method comprising:

identifying a subject having a disorder characterized by unwanted cell proliferation; and

administering to the subject a cell expressing a TSP-2 comprising an amino acid sequence identical to the sequence of SEQ ID NO:2, or a functional fragment thereof, capable of inhibiting endothelial cell migration, wherein the fragment comprises at least 10 contiguous amino acids of either a procollagen domain of TSP-2, or a type I repeat of TSP-2.
